

The following chart appeared in the Nov 1991 "*Chronicles*" and was extracted from:

**A FAMILY GENEALOGY OF (IMMIGRANT) HENRY ELLER &  
ELIZABETH BIGLER ELLER OF MARYLAND AND DESCENDANTS**

*by Clarice V. Eller Stanley, 605 Vine St., Martins Ferry, OH 43935.*

Interpretations of the chart....

1. Numeral preceding each name denotes the generation of that individual counting from Henry Eller as of the first generation.
2. Observe that siblings will always have the same generation number.
3. Succeeding generations are indented immediately after the progenitor of that generation. For example, children of Henry Eller are of generation 2 and each is indented after Henry Eller's name.
4. Grandchildren of Henry Eller are of generation 3 and are indented after the listing of their parents.
5. A 3-digit (RIM) number follows each name. This relates to the computer and for the casual reader can be ignored. This is automatically assigned by the computer when the name is first entered. It is essential to the computer process by which descendants' charts such as the following are generated.
6. The 4-digits in parenthesis after each name is the birth year for that individual.
7. Data is first entered into the computer in such form as to generate Family Group Sheets. Every individual with its RIM is entered as a member of a Family Group and then that group is given an automatic MRIN number by the computer. A combination of RIN and MRIN numbers enable the computer to automatically reformat the data into Descendant Charts and many other configurations.

**DESCENDANCY CHART**

1-Henry ELLER Farmer-282 (1726)  
sp-Elizabeth BIGLER-283 (1735)  
  2-- Joseph ELLER-284 (1750)  
    sp-Elizabeth GRABILL-1524
